***Election/Restrictions***

Applicant's election without traverse of Group II, claims 5-11 in Paper No. 3 is acknowledged.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 is indefinite. It is not clear as to what elements are being claimed. Claim 5 is directed to a guide catheter whereas claim 10 appears to be directed to a combination of the guide catheter and imaging and passageway forming catheters. Since claim 5 is directed solely to the guide catheter, claim 10 fails to further define the structure of the guide catheter.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5, 6, 9, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Milo et al (5429136).

Milo et al discloses a guide catheter 12 including an elongate catheter body having at least one lumen extending longitudinally therethrough, an opening 24 formed in the catheter body and a pressure exerting member 26 formed on the catheter body for engaging a luminal anatomical structure.

Claim 6, see column 5, lines 4-11.

Claim 9, see column 6, lines 5+.

Claim 10, in so far as definite is readable on the catheter as disclosed by Milo, et al.

Claim 11, see column 5, lines 4-11.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Milo, et al as applied to claim 5 above, and further in view of Jang, et al.

The use of means for increasing the coefficient of friction between the balloon and the affected tissue is well known in the art as shown by Jang, et al. To provide the outer surface of the balloon of Milo, et al with means for increasing the coefficient of friction to provide a more secure engagement with the affected tissue would have been

obvious to one with ordinary skill in the art from the teachings of Jang, et al. See mesh inflatable member of Jang, et al.
